

Assessing Dangerousness Violence By Batterers And Child Abusers Second Edition

Thank you very much for downloading **Assessing Dangerousness Violence By Batterers And Child Abusers Second Edition**. Most likely you have knowledge that, people have seen numerous times for their favorite books in the same way as this **Assessing Dangerousness Violence By Batterers And Child Abusers Second Edition**, but end in the works in harmful downloads.

Rather than enjoying a fine book past a mug of coffee in the afternoon, instead they juggled following some harmful virus inside their computer. **Assessing Dangerousness Violence By Batterers And Child Abusers Second Edition** is reachable in our digital library an online right of entry to it is set as public suitably you can download it instantly. Our digital library saves in complex countries, allowing you to acquire the most less latency era to download any of our books behind this one. Merely said, the **Assessing Dangerousness Violence By Batterers And Child Abusers Second Edition** is universally compatible similar to any devices to read.

Family Interventions in Domestic Violence John Hamel, LCSW 2006-09-26 In

this exciting new book John Hamel, author of the ground-breaking *Gender-Inclusive Treatment of*

Intimate Partner Abuse, and Tonia Nicholls go beyond the traditional intervention theories of domestic violence practiced today. Offering alternative, unbiased and sometimes controversial views, theories, and current research, they, along with renowned contributors in the field, provide new treatment options that encompass a wide range of gender dynamics. Here are just some of the key principles covered: Interventions Should Be Based on a Thorough Unbiased Assessment Victim/Perpetrator Distinctions are Overstated, and Much Partner Abuse is Mutual Regardless of Perpetrator Gender, Child Witnesses to Partner Abuse are Adversely Affected, and are at Risk for Perpetrating Partner Abuse as Adults This new gender-inclusive approach to assessment and intervention provides a significant departure from traditional paradigms of

domestic violence, and offers a much-needed awareness to effectively prevent violence in our communities today and for future generations. Working with Domestic Violence Deborah Walsh 2018-12-20 This textbook equips social workers and human services practitioners with the knowledge and skills to work effectively with both the victims and perpetrators of domestic violence. Written to address the needs of the social work and human services student learner, the book covers a range of domestic violence issues that will prepare the student for practice. With an underlying structural feminist conceptual framework that works towards empowering service users whilst challenging the structures that perpetuate violence, Working with Domestic Violence includes: 18 chapters covering the broad spectrum of issues that arise from working with

domestic violence A clear practice framework for applying theoretical knowledge when working with individuals and families in domestic violence contexts Practice tips, key facts, case examples, activities, and reflective questions designed to enhance the reader's engagement with the ideas, debates, and practice challenges introduced in the text An extensive index and glossary to support student understanding of the material A user-friendly and engaging style that will find application as an entire course book as well as for students or lecturers interested in selecting individual chapters for certain modules Working with Domestic Violence is essential reading for students undertaking undergraduate and postgraduate coursework courses in social work and human services, and those completing a postgraduate counselling qualification.

The book will also be a valuable resource for students of community work, youth work, education, nursing and other allied health courses, community services, disability, and welfare studies.

Child Sexual Abusers

Jackie Craissati 2021-10-31

Uniquely, this book aims to provide students and practitioners with a knowledge base in relation to child sexual abusers which is focused on practice - assessment, treatment and evaluation - but rooted in psychological theory. Its strength lies in the simplification and outlining of a coherent approach to this group of offenders that is afforded by the single-author treatment, particularly so given that this author has developed and managed a sex offender project in South East London which is now one of the largest, longest running, and most thoroughly evaluated in the country.

Violent fathering and the risks to children Harne, Lynne 2011-05-25 Current family policy approaches emphasise the significance of paternal involvement in children's lives, yet there has been a silence on violent and abusive fathering in these discourses. This is the first UK book to specifically focus on violent fathering discussing original research in the context of domestic violence and emerging practice literature to address this problem. The book examines fathers' perceptions of their domestic violence and its impact on children, their relationships with children and their parenting practices. It will be of interest to academics and professionals in family and child welfare policy, socio-legal studies, social work, criminology and other disciplines with an interest in domestic violence and child protection.

Tackling Domestic Violence:

Theories, Policies And Practice Harne, Lynne 2008-07-01 This accessible text takes a multi-disciplinary approach to exploring issues surrounding domestic violence. It draws on contemporary research findings, policy developments, innovative practice and case studies to explore new directions in professional and voluntary sector responses to domestic violence.

Handbook of Forensic Mental Health with Victims and Offenders David W. Springer, PhD, LCSW 2007-01-16 Designated a Doody's Core Title! Together for the first time; all your forensic social work best practice needs in one volume! "...a vitally important addition to this emerging and essential body of knowledge. This compelling publication places between two covers a broad collection of informative, original essays on core issues in forensic social work. This engaging

volume offers readers keen insights into forensic practice related to child abuse and neglect, domestic violence, suicide, psychiatric care and mental illness, juvenile justice, adult corrections, addictions, trauma, and restorative justice." --from the foreword by Frederic G. Reamer, School of Social Work, Rhode Island College From expert testimony advice to treating HIV-positive incarcerated women, this handbook contains the most current research and tested field practices for child welfare through adulthood in the civil and criminal system. Encompassing a wide range of treatments, roles, specialized practices, research, and diagnoses, the Handbook of Forensic Mental Health With Victims and Offenders will guide practicing professionals through the forensic social work issues they encounter on a daily basis, such as: Prevention of prisoners' sudden deaths Expert

witness testimony in child welfare and women battering Treatment of dually diagnosed adolescents The overrepresentation of African-Americans incarcerated for juvenile delinquency Jail mental health services for adults Drug courts and PTSD in inmates with substance abuse histories Recidivism prevention Basic tasks in post-trauma intervention with victims and offenders Culture and gender considerations in restorative justice Edited by Dr. Albert R. Roberts and Dr. David W. Springer, with contributions by leaders in the field, this handbook should top the list of must-have publications for all forensic social workers. Domestic Violence Michael Freeman 2017-03-02 Domestic violence - domestic hooliganism it has been called - is one of the cancers of our age. This volume offers a challenging selection of materials as a

picture of a multi-faceted problem. The issues embraced range from criminal and civil law responses and the value of mediation, to the impact on children, and to the cultural context. The materials are derived from a variety of sources and from different disciplines to offer the reader an understanding of the problem not easily culled from standard library resources.

Public Health Reports

2006

Domestic Violence Advocacy

Jill Davies 2013-08-12

Domestic Violence

Advocacy: Complex

Lives/Difficult Choices,

Second Edition is a

comprehensive and highly

practical resource for

anyone working with

domestic violence victims.

The essential elements and

values of the victim-defined

approach provide the

foundation for a completely

revised exploration of all

victims' perspectives and

advocates' roles. Authors Jill

Davies and Eleanor Lyon draw on the far-reaching progress and increased knowledge of the field and delve deeply into the experiences of victims, their perspectives and decision-making, culture, and risks. Attentive to the real-world context of limited time, resources, and options for victims and for advocates, this enlightening text focuses on what is feasible and offers ideas for working within such constraints.

Social Work and Family Violence, Second Edition

Joan McClennen, PhD

2016-08-28 The second

edition of this

comprehensive text for MSW

and BSW students studying

family violence is fully

reorganized for improved

flow of information, is

substantially revised, and is

updated to reflect current

scholarship and practice.

Focusing on child abuse and

maltreatment, intimate

partner violence (IPV), and

older adult abuse, the book

covers assessment

procedures and evidence-based treatments used by social workers with victims and perpetrators of all age groups and of both genders. It provides expanded information on agencies advocating on behalf of children including child advocacy centers, guardians ad litem, and court-appointed special advocates as well as child welfare laws and policies. The textbook provides updated information related to IPV and vulnerable/at-risk populations including sex trafficking victims, veterans, and male victims. The second edition also features more in-depth theoretical information integrated with case studies, and new information regarding technological issues and criminal justice reform. The authors address assessments and interventions for adult victims of family violence, adult survivors of child abuse, child witnesses of domestic violence,

adolescent victims of dating violence, older adult victims of abuse, and both male and female perpetrators of abuse. The text encompasses several features that make it particularly useful in the classroom, including real-life case studies in every chapter, key terms, and discussion questions. An updated and robust instructor package includes a fully revised Test Bank and more detailed PowerPoints. New to the Second Edition: Aligns with 2015 CSWE Educational Policy and Accreditation Standards Adds updated news articles to help stimulate discussion on chapter content Updated instructor package including fully revised Test Bank Updated and expanded PowerPoint presentations Expanded information in the child maltreatment section on child advocacy centers, guardians ad litem, and court-appointed special advocates A new child maltreatment case example

and SMART plan Updated child welfare laws and policies Expanded coverage of safety planning and protection orders for IPV victims New coverage of IPV and sex trafficking Expanded coverage of IPV with male victims and their female perpetrators Coverage of multiple vulnerable and at-risk populations Use of pet therapy and service dogs for IPV in military Updated material on causation of older adult abuse Inclusion of instrument to screen for maltreatment Expanded chapter on assessment and intervention of older adult abuse Example of a possible risk assessment for older adults

Good Practice in Risk Assessment and Risk Management 2 Hazel

Kemshall 1997 The range of problems that arise due to violence, mental health problems, substance abuse and familial breakup require fast accurate risk assessment. These two

volumes by Kemshall and Pritchard explores the techniques needed to solve such problems.

Assessing Dangerousness Jacquelyn C. Campbell 2017-03 Practitioners in the social, behavioral, and health fields often work with perpetrators and survivors of interpersonal violence. Many are asked to make predictions about the likelihood of future violence. *Assessing Dangerousness* reviews the intricacies of predicting intimate partner violence and homicide as well as child abuse and homicide to better prepare readers to make such assessments. Extensively revised, this classic volume highlights the latest research in clear and accessible language. Each contributor, a noted expert in their field, has faced the difficult task of assessing the risk of intimate partner violence and child abuse in courtrooms, clinics, shelters, hospitals, schools, and more. Their experience in

research and practice makes this the go-to resource for anyone required to make predictions about violent behavior in family settings. KEY FEATURES: Presents clinical and court examples requiring the assessment of risk and danger that appeals to practitioners in social work, psychology, nursing, counseling, criminology, and public health. Introduces an evidence based approach that practitioners can use to integrate risk assessment in a variety of settings. Covers the latest risk assessment instruments for use in the field including the Danger Assessment, the DVSI-R, and the ODARA. Highlights the newest and most promising applications of risk assessment such as the Maryland Network Against Domestic Violence Lethality Assessment Program. Synthesizes related legal and ethical issues to help practitioners implement risk assessment in a responsible way. Identifies prediction factors and risk markers for

use in interventions. Exposes the overlap between child and intimate partner homicide, instrumental in identifying families with multiple risks. Presents the latest research on the risk of re-assault in intimate partner violence and risk over the life course. Reviews the latest version of Dr. Campbell s Danger Assessment, the most widely used homicide risk assessment instrument for intimate partner violence survivors. Introduces two new authors in the chapters on child abuse lethality assessments and risk of IPV exposing readers to the rising stars in the field. "

Domestic Violence Mangai Natarajan 2017-05-15

Domestic Violence is not just a public health and criminal justice problem, it is also an issue of universal human rights that needs immediate and vigorous attention. How we measure the prevalence of Domestic Violence, what we identify as the risk factors, which theories seem

to provide most help in understanding and responding to Domestic Violence, which preventive and treatment programs seem most effective and the respective roles of the health and criminal justice systems, are all questions of vital importance in society's response to the problem.

Studies in the Assessment of Parenting Peter Reder
2004-06-02 Offers a review of the latest literature but moreover a practical guide essential to professionals who give their expert opinions to courts in child care cases.

Quick Reference to Adult and Older Adult Forensics

Mary E. Muscari, PhD, MSCr, CPNP, PMHCNS-BC, AFN-BC
2010-05-20 2010 AJN Book of the Year Award Winner in Gerontologic Nursing! "[This book] is a wonderful guide to adult and elder forensics, and an important reference for all health care providers who care for adults and the elderly...Highly recommended." --CHOICE

"It's about time this book was written! While excellent instructional texts exist, this book fills a niche for the nonspecialty health professional encountering victims of violence in the routine course of care. This book should not only be on the shelf in every ED, but also in the armamentarium of providers working in the outpatient setting; public health clinics; residential facilities and student health clinics." --AJN Nurses and other health care professionals who work with victims and perpetrators of violence are often confronted with issues that they may not have prior training in, such as identifying and managing victims of violent crime. This book is designed to serve as a quick resource for practicing health care providers treating adults and older adults, as well as students or practitioners new to the field. The book not only has full descriptions of principles of evidence, but

also offers detailed guidelines on how to conduct a forensic assessment of adults and older adults. Additionally, the authors examine the concepts of competency and guardianship, and provide guidelines for navigating the justice system. The authors provide current, concise, and easy-to-use information in short chapters that assist practitioners with the prevention of crimes and the identification and management of both victims and offenders. Key features: Presents general principles of forensics, such as assessment and documentation, principles of evidence, and expert witness testimony Covers a wide range of classes of adult victims, including victims of intimate partner violence, human trafficking, stalking, and sexual assault Discusses various types of offenders, such as long-term offenders, those in correctional facilities, abusive parents, and female

offenders Includes a section on unnatural deaths, covering suicide, homicide, and medicolegal death investigation

Structured risk assessment of (sexual) violence in forensic clinical practice

Vivienne de Vogel 2005

Violence in Families National Research Council and Institute of Medicine 1998-03-13 Reports of mistreated children, domestic violence, and abuse of elderly persons continue to strain the capacity of police, courts, social services agencies, and medical centers. At the same time, myriad treatment and prevention programs are providing services to victims and offenders. Although limited research knowledge exists regarding the effectiveness of these programs, such information is often scattered, inaccessible, and difficult to obtain. *Violence in Families* takes the first hard look at the successes

and failures of family violence interventions. It offers recommendations to guide services, programs, policy, and research on victim support and assistance, treatments and penalties for offenders, and law enforcement. Included is an analysis of more than 100 evaluation studies on the outcomes of different kinds of programs and services. Violence in Families provides the most comprehensive review on the topic to date. It explores the scope and complexity of family violence, including identification of the multiple types of victims and offenders, who require different approaches to intervention. The book outlines new strategies that offer promising approaches for service providers and researchers and for improving the evaluation of prevention and treatment services. Violence in Families discusses issues that underlie all types of family violence, such as the

tension between family support and the protection of children, risk factors that contribute to violent behavior in families, and the balance between family privacy and community interventions. The core of the book is a research-based review of interventions used in three institutional sectors--social services, health, and law enforcement settings--and how to measure their effectiveness in combating maltreatment of children, domestic violence, and abuse of the elderly. Among the questions explored by the committee: Does the child protective services system work? Does the threat of arrest deter batterers? The volume discusses the strength of the evidence and highlights emerging links among interventions in different institutional settings. Thorough, readable, and well organized, Violence in Families synthesizes what is known and outlines what needs to be discovered. This

volume will be of great interest to policymakers, social services providers, health care professionals, police and court officials, victim advocates, researchers, and concerned individuals.

Treatment of Child Abuse

Robert M. Reece 2005-04-05

"Highly recommended for expert and beginner alike. It is well written, well organized, easy to read, and packed with useful information." -- Child Abuse & Neglect "This book represents a milestone in expanding the resource base for professionals working in the child abuse field." -- Journal of Child and Family Studies

Assessing and Treating Physically Abused Children and Their Families

David Kolko 2002-03-19 This book is the first attempt to provide a comprehensive, practical approach to the assessment and treatment of physically abused children. It presents an overview of child physical

abuse (including statistics and consequences), and discusses outcomes studies and treatment implications, also discusses assessment and treatment options in depth.

Forensic Psychology Graham

M. Davies 2012-04-23

Forensic Psychology is essential reading for all undergraduate courses in forensic psychology and an excellent introduction for more detailed postgraduate courses. Expert authors cover every aspect of forensic psychology, from understanding criminal behaviour, to applying psychological theory to criminal investigation, to analysis of the legal process and the roles of witnesses, to the treatment of offenders.

Good Practice in Risk Assessment and Risk Management

Hazel

Kemshall 1996 This book

examines the key issues and methods of risk measurement and management. A variety of

social care settings are included, with examples of practice.

Social Work, Domestic Violence and Child Protection

Catherine Humphreys 2000-01-26 This report explores the problems and opportunities presented for child protection workers responding to child abuse that occurred in the context of violence towards the child(ren)'s mother. This particular aspect of domestic violence intervention is frequently overlooked as issues such as policing, child contact, interagency working and offender programmes have gained precedence in the development of intervention strategies. This report is important reading for practitioners, policy makers and managers in social services, and their equivalents in a range of other agencies involved in child protection. It is also valuable reading for social work academics and

students interested in the area of domestic violence.

Assessing

Dangerousness Jacquelyn C. Campbell 1995 Using a firm research and theoretical approach, this volume brings together experts in the fields of health, mental health, and criminal justice to predict future violence. In language accessible to clinicians, *Assessing Dangerousness* discusses the prediction of homicide in spouse abuse, of child abuse using the Child Abuse Potential Inventory, of further violence by sexual offenders, and of further assault by batterers. The contributors, wellknown in their areas of expertise, discuss accurate measurement using tested instruments as well as the role of clinical observations. The introductory chapter presents the theoretical and clinical issues involved in predicting violence in general, and the final chapter summarizes the

major points and presents the health and judicial implications of the findings. "Learning how to predict violence is an important skill. This book is the equivalent of a university course on the subject." -- Ron MacIssac, review in What's Happening, Victoria, B.C. "This text addresses one of the most difficult issues in the assessment and treatment of violent individuals--assessing their degree of dangerousness and risk of recidivism. *Assessing Dangerousness* takes the reader through an educated discussion of the different models for assessing dangerousness that have appeared since the 1950s and 1960s up until the present and, most significantly, presents up-to-date approaches to tackling such assessment areas as physical and sexual abuse, sexual assault, and wife assault. Drawing on the research and clinical expertise of prominent individuals, the text

accomplishes its task of describing the importance and the limitations to assessing risk of dangerousness. The volume should appeal to professionals in law, criminal justice, psychology, social work, psychiatry, and many related disciplines." --David A. Wolfe, University of Western Ontario "Highly recommended." --Family Violence & Sexual Assault Bulletin Book Club
Assessing Dangerousness
Jacquelyn C. Campbell, PhD, RN, FAAN 2007-05-25 This updated edition of the classic book on risk assessment presents the latest research regarding the prediction of interpersonal violence. In clear and accessible language, the authors address the specific variables involved in the prediction of child abuse and homicide, as well as intimate partner violence and homicide. This edition also presents an important revision of Campbell's

ground-breaking intimate partner homicide lethality risk instrument, the Danger Assessment. All of the contributors to this multidisciplinary volume have faced the difficult task of assessing the risk of family violence in a wide variety of settings--courts, clinics, shelters, emergency rooms, protective service offices, schools, batterer intervention programs, violence prevention programs, and more. Their combined experience in research and practice makes this an indispensable resource for all clinicians required to make predictions about violent behavior. Key features of this new edition include: Coverage of a wide breadth of clinical and court situations requiring threat assessments A review of the latest assessment instruments New findings on predicting fatal child abuse Legal and ethical issues in risk assessment
Psychological Assessment of Sexually Abused Children

and Their Families William N Friedrich 2002 Designed for professionals in the field of child maltreatment, this authoritative book presents a compelling theoretical framework that guide's assessment of children and adolescents who have been sexually abused and their parents. The book is designed to make it easier for clinicians to select a number of measures or procedures across three dimensions that have considerable clinical relevance – attachment, dysregulations, and self-perception. Psychological Assessment of Sexually Abused Children and Their Families features in particular the assessment of sexually aggressive children and an extensive set of interview formats, checklists, and other forms that clinicians will find especially useful in evaluating children and their families. The book is also richly illustrated with case studies.

Targeting Domestic Abuse with Police Data Matthew P. Bland 2020-09-29 This book explores the potential of domestic abuse data to assess the level of harm caused to victims and the amount of resources required to respond to it. Policing domestic abuse has become a major activity for the police service in England and Wales. Part of the police strategy is to gather hundreds of thousands of detailed records about victims and suspects – the single largest set of domestic abuse records available, but one that to date has largely unexplored by researchers. In this volume, Matthew Bland and Barak Ariel analyse three substantial datasets taken from police forces across the country and ask: · Can police data be used to derive meaningful insight? · How should we use these data to measure harm? · Just how much domestic abuse involves a repeat victim? · Does abuse get more

serious over time? · Can serious domestic abuse be predicted before it occurs? This volume illustrates the scale of the challenge the police and other agencies face with reducing domestic abuse. A small proportion of individuals generate a majority of harm; this book argues that police records offer opportunities to identify these individuals before the harm occurs. Demonstrating that statistical techniques can be used to profile domestic abuse to target harm reduction strategies more precisely and even identify a sizable proportion of serious cases before they occur, this volume will be of interest to law enforcement officials, policing researchers, and policy makers interested in reducing the phenomenon of domestic abuse.

Assessing Dangerousness Jacquelyn C. Campbell, PhD, RN, FAAN 2007-05-25 This updated edition of the classic book on risk assessment presents

the latest research regarding the prediction of interpersonal violence. In clear and accessible language, the authors address the specific variables involved in the prediction of child abuse and homicide, as well as intimate partner violence and homicide. This edition also presents an important revision of Campbell's ground-breaking intimate partner homicide lethality risk instrument, the Danger Assessment. All of the contributors to this multidisciplinary volume have faced the difficult task of assessing the risk of family violence in a wide variety of settings--courts, clinics, shelters, emergency rooms, protective service offices, schools, batterer intervention programs, violence prevention programs, and more. Their combined experience in research and practice makes this an indispensable resource for all clinicians required to make predictions

about violent behavior. Key features of this new edition include: Coverage of a wide breadth of clinical and court situations requiring threat assessments A review of the latest assessment instruments New findings on predicting fatal child abuse Legal and ethical issues in risk assessment

Sex Offenders J. V. Fenner 2008 This book deals with society's responses to sex offenders. This issue is of vital interest to law enforcement professionals and society at large. This subsection of the population generates as much or more fear than virtually any other segment in the community. The chapters in this book deal with recidivism, tracking and location, impulsivity, long-term care, and reunification.

The Clinical and Forensic Assessment of Psychopathy Carl B. Gacono 2015-11-19 This newly revised edition to *The Clinical and Forensic Assessment of Psychopathy: A Clinician's Guide* brings

new chapters on psychopathy in women, brain imaging, assessment and treatment in schools, and more, in addition to the updated original chapters. With its in-depth research on psychopathy, accumulating findings from over the past 40 years and applying them to procedures and methods, it is essential for all of those who face mental health, correctional, or court settings. This edition is an excellent resource for experienced professionals and their trainees, as well as students who need a go-to book between the research and practice on the assessing of psychopathy. Good Practice in Working with Violence Hazel Kemshall 1999 Approaching the issue from a practitioner's viewpoint, Good Practice in Working with Violence focuses on working with perpetrators of violence that has resulted in both physical and psychological harm. Drawing on the experiences of

contributors from a range of backgrounds, the book discusses the challenges involved in working with violence and its effects. Relevant for a variety of practice settings, Good Practice in Working with Violence is a comprehensive guide to the techniques and skills required for good practice in assessing and managing violence.

Domestic Violence and Child Protection Nicky Stanley 2006-01-30 How do you respond simultaneously to the needs of adults experiencing domestic violence and the specific needs of their children? Domestic Violence and Child Protection explores the challenges of working effectively in this complex field and offers positive models for practice. Leading practitioners and researchers outline the essential safety considerations for children, adult victims and child protection workers, and stress the importance of

children's experiences, using children's own words to describe their diverse needs. The contributors offer examples of good practice in prevention, intervention and recovery, drawn from international settings. They highlight new directions for policy and practice, and consider whether these might be achieved through increased communication and coordination between agencies, or by developing multiprofessional agencies that are able to offer integrated responses. Individual chapters address child abduction, legal issues concerning child contact arrangements, and dealing with abuse in the context of divorce. Including perspectives from social services, health services and the voluntary sector, this book is a valuable source of information and ideas on how to work safely and sensitively with children living with domestic violence and will be a key reference

for social workers, health professionals and policy makers.

Encyclopedia of Domestic Violence and Abuse [2 volumes]

Laura L. Finley
2013-07-16 This comprehensive, two-volume work examines domestic abuse in the United States and worldwide, providing research, personal stories, and primary documents that reveal the extent of the problem. • Presents personal narratives that highlight the importance of each survivor's unique experience with abuse • Includes primary source documents that address key legislation and court cases • Provides a wide range of resources for researchers, such as recommended reading and film lists as well as state, national, and international organizations related to domestic abuse

Handbook of Violence Risk Assessment

Randy K. Otto 2010 This comprehensive handbook of original chapters

consolidates what is known about contemporary risk assessment instruments and serves as a resource for legal, correctional, and mental health professionals. Two introductory chapters cover general issues in violence risk evaluation, while the remainder of the book offers a comprehensive discussion of specific risk assessment measures. Each chapter is prepared by the author(s) of the assessment tool under discussion and helps readers to determine whether and how to use the instruments covered in the book.

A Typology of Domestic Violence Michael P. Johnson
2010-09-01 Reassesses thirty years of domestic violence research and demonstrates three forms of partner violence, distinctive in their origins, effects, and treatments

Violence and Sexual Abuse at Home Susan Sorenson
2014-01-09
Violence and abuse that occur behind closed doors

are not just personal concerns or issues. Family violence is a major mental health, social service, health care, and criminal justice problem that society cannot continue to ignore. *Violence and Sexual Abuse at Home* gives you the facts of spouse/partner and child maltreatment, an analysis of the intervention and prevention techniques commonly used, and alternative approaches and theories for understanding and reducing instances of family abuse. The factors behind maltreatment are multiple and diverse. Because there are so many approaches to treating perpetrators and victims, choosing a treatment strategy can sometimes feel overwhelming. Use *Violence and Sexual Abuse at Home* to help you decide which treatment models will be most effective in particular situations. Don't risk low success rates with your patients. This comprehensive guidebook

can help you refine your treatment strategies, as you better your understanding of: mutual combat the ethical issues and legal mandates involved in reporting family maltreatment biological issues and aggression the causes of the physical maltreatment of children maltreatment of children with disabilities the debate surrounding “parent alienation syndrome” difficulties in diagnosing incest offenders the impact of child sexual maltreatment on the survivor’s sexuality and sexual functioning the repression, dissociation, and delayed recall of traumatic events Violence and Sexual Abuse at Home shows clinicians, researchers, advocates, and other professionals the importance of broadening their perspectives of all types of family maltreatment. Anyone working with people who abuse and/or with adults and children who are or

have been abused should understand the developmental, social, psychological, cultural, and biological issues at play in violent home environments. **Handbuch Häusliche Gewalt** Melanie Büttner 2020-11-07 Das Grundlagenwerk für Aufklärung, Intervention, Beratung und Therapie - Praxisorientiert: Interventionen zum Gewaltschutz, Strategien für die Beratung und Therapie, Fallbeispiele - State of the Art: Expertinnen und Experten aus Wissenschaft und Praxis geben Einblicke in Grundlagen und Handlungsansätze - Hochaktuell: Gewalt im häuslichen Umfeld ist bis heute weit verbreitet - Konkurrenzlos: Das erste Standardwerk für alle relevanten Berufsgruppen Das multiperspektivische Handbuch führt in die Erscheinungsformen und Hintergründe häuslicher Gewalt ein und gibt einen Überblick über frühe Hilfen,

Assessment and Risk in Social Work Brian J. Taylor
2017-04-10 This book, written for practicing social workers undertaking their ASYE and compulsory CPD, has been designed to help professionals make sound judgments in increasingly complex contexts and under pressure.

Child Custody and Domestic Violence Peter G. Jaffe 2003 A call for safety and accountability.
Child Maltreatment Risk Assessments Sue Righthand 2013-03-07 Conduct targeted and focused evaluations of child abuse and neglect! *Child Maltreatment Risk Assessments: An Evaluation Guide* is a professional practice manual designed to assist clinicians in conducting forensic risk assessment in child maltreatment cases. The authors—each with an extensive background in forensic child abuse evaluation—present up-to-date research findings and

provide practical, fact-based information on key issues. The book is an essential reference source on procedural issues, treatment options, and risk management strategies necessary to make high-quality, ethical evaluations. Child maltreatment risk assessments are complex, specialized evaluations with the potential for permanent legal termination of all parent-child contact on one hand, and the possibility of injury and even death on the other. Because of the weighty nature of these issues, the legal standards imposed on individual states to justify intervention is great, and evaluators must be well versed in the most current material available. *Child Maltreatment Risk Assessments* provides up-to-date information on the effects of maltreatment, empirically based risk factors for child abuse and neglect, specialized assessment techniques and interventions, and

professional practice issues. The book emphasizes the importance of individual and cultural differences. *Child Maltreatment Risk Assessments* also includes a step-by-step guide to conducting and writing quality evaluations, including: components of an evaluation report forensic versus clinical evaluations methods of assessment assessment domains and much more! *Child Maltreatment Risk Assessments: An Evaluation Guide* is an invaluable tool for clinicians, lawyers and judges, human service agency personnel, and others involved in child maltreatment cases as well as students who represent the next generation of clinicians working in child abuse prevention and treatment.

Parenting by Men Who Batter Jeffrey L. Edleson 2007 What is the best way to work with fathers who have a history of abusive behavior? This question is

among the thorniest that social service and criminal justice professionals must deal with in their careers, and in this essential new work Jeffrey L. Edleson, Oliver J. Williams, and a group of international colleagues examine the host of equally difficult issues that surround it. Beginning with the voices of mothers and fathers who speak about men's contact with and parenting of their children, the authors then examine court and mental health services perspectives on how much involvement violent men should have in their children's lives. The second half of the book showcases programs such as the Boston-based *Fathering After Violence* initiative and the *Caring Dads* program in Canada, which introduce non-abusive parenting concepts and skills to batterers and have developed useful guidelines for intervention with these fathers. Visionary but also practical, *Parenting by Men*

Who Batter distills the most relevant policy issues, research findings, and practice considerations for those who coordinate batterer programs or work with families, the courts, and the child welfare system. It guides professionals in

understanding men who batter, assessing their parenting skills, making decisions about custody and visitation, and modeling treatment programs that engage fathers in their children's lives while maximizing safety.
