The book profiles the tools used by criminal law to protect confidential information. It deals with the essence of information, the varieties of confidential information, and the basic models for its protection within the context of the Internet and social networks. Eli Lederman examines the key prohibitions against collecting protected information, and against using, disclosing, and disseminating it without authorization. The investigation cuts across a broad subject matter to discuss and analyze key topics such as trespassing and peeping, the human body as a source of information, computer trespassing, tracking and collecting personal information in the public space, surveillance, privileged communications, espionage and state secrets, trade secrets, personal information held by others, and profiling and sexting. *Infocrime* will appeal to graduate and undergraduate scholars and academics in the legal arena, in law schools and schools of communication, and to practicing lawyers with an interest in legal theory and a concern for

the protection of the personal realm in a world of increasingly invasive technologies.

Classical Chinese Medicine Keekok Lee 2018-07-26

This volume completes a trilogy (Lee, 2012, 2017) on the philosophy of medicine, Western and Chinese. Its immediate prequel (Lee, 2017) sets out

in general outline the philosophical and methodological core of Classical Chinese Medicine (CCM); this volume fleshes out that “skeleton” by examining in detail its peculiar concepts and characteristics, such as Getihua/Personalised Medicine, Preventive Medicine, Tianren-xiangying (Macro-Micro-cosmic Wholism), Zhèng-Fang Wholism (Wholism at the level of diagnosis and treatment), and Mind-Body Wholism (the person as primitive concept). CCM is here shown to instantiate “ecosystem science”, which is post-Newtonian in orientation, departing from familiar Newtonian landmarks such as Reductionism and linearity, resting on thing-ontology for a non-reductionist, non-linear science. This approach highlights a rich irony and paradox: namely, how CCM in being backward-looking (relying on classical texts as foundational texts and prescriptions of some two thousand years standing) simultaneously manages to be at the cutting edge of scientific thinking today.

Garden of Secrets Past Anthony Eglin 2011-08-16 Can Lawrence Kingston unearth the key to a deadly secret hidden by a mysterious ancient garden inscription in the newest English Garden Mystery? Codebreakers have tried for centuries to decipher the enigmatic inscription on a strange monument in the garden at Sturminster Hall, but no one has ever succeeded. When a murder occurs on the garden grounds, the intellectual puzzle becomes all too real, and Dr. Lawrence Kingston—retired professor of botany and reluctant sleuth—is called in to investigate. Other than a scrap of paper bearing a random sequence of letters found on the victim, the police have no meaningful clues. Convinced that the crime must be linked to the

seemingly unbreakable centuries-old code, Kingston begins hunting for clues that will help him unmask the murderer's identity as well as the arcane mystery of the monument. But he quickly finds himself swept along in the dangerous undertow of a centuries' old family conflict and a second murder, by poisoning. What could be so valuable, so important to justify such extreme measures and complex codes to keep sacrosanct for over two centuries? To unlock the garden's dark secret, Kingston must delve into the brilliant minds of three famous men to fathom what part each may have played in masterminding the riddle: an Admiral hailed as father of Britain's navy, the author of England's most celebrated poem, and Great Britain's first Prime Minister. But as Kingston's investigation into an England's past leads him closer to a killer in the very dangerous present, his own prospects for survival start to look less and less assured.

Eyes Everywhere Aaron Doyle 2013-03-01 In many countries camera surveillance has become commonplace, and ordinary citizens and consumers are increasingly aware that they are under surveillance in everyday life. Camera surveillance is typically perceived as the archetype of contemporary surveillance technologies and processes. While there is sometimes fierce debate about their introduction, many others take the cameras for granted or even applaud their deployment. Yet what the presence of surveillance cameras actually achieves is still very much in question. International evidence shows that they have very little effect in deterring crime and in 'making people feel safer', but they do serve to place certain groups under greater official scrutiny and to extend the reach of today's 'surveillance society'. *Eyes Everywhere* provides the first international perspective on the development of camera surveillance. It scrutinizes the quiet but massive expansion of camera surveillance around the world in recent years, focusing especially on Canada, the UK and the USA but also including less-debated but important contexts such as Brazil, China, Japan, Mexico, South Africa and Turkey. Containing both broad overviews and illuminating case-studies, including cameras in taxi-cabs and at mega-events such as the Olympics, the book offers a valuable oversight on the status of camera

surveillance in the second decade of the twenty-first century. The book will be fascinating reading for students and scholars of camera surveillance as well as policy makers and practitioners from the police, chambers of commerce, private security firms and privacy- and data-protection agencies.

Justice Provocateur Gray Cavender 2012-08-15 *Justice Provocateur* focuses on *Prime Suspect*, a popular British television film series starring Oscar and Emmy award-winning actress Helen Mirren as fictional London policewoman Jane Tennison. Gray Cavender and Nancy C. Jurik examine the media constructions of justice, gender, and police work in the show, exploring its progressive treatment of

contemporary social problems in which women are central protagonists. They argue that the show acts as a vehicle for progressive moral fiction--fiction that gives voice to victim experiences, locates those experiences within a larger social context, transcends traditional legal definitions of justice for victims, and offers insights into ways that individuals might challenge oppressive social and organizational arrangements. Although *Prime Suspect* is often seen as a uniquely progressive, feminist-inspired example within the typically more conservative, male-dominated crime genre, Cavender and Jurik also address the complexity of the films' gender politics. Consistent with some significant criticisms of the films, they identify key moments in the series when Tennison's character appears to move from a successful woman who has it all to a post-feminist stereotype of a lonely, aging career woman with no strong family or friendship ties. Shrewdly interpreting the show as an illustration of the tensions and contradictions of women's experiences and their various relations to power, *Justice Provocateur* provides a framework for interrogating the meanings and implications of justice, gender, and social transformation both on and off the screen.

Secrets, Spies and 7/7 Tom Secker 2014-09-14 On July 7th 2005 London suffered the worst terrorist attack in its history. Despite one of the largest police investigations ever to take place in Britain, to date not a single person has been found guilty for the atrocity that killed over 50 people. Using unsealed court documents and declassified intelligence agency files *Secrets, Spies and 7/7* takes you on a journey through the labyrinth of disinformation about the bombings. Drawing on over 7 years of research, Tom Secker shows how the official version of events, which blamed 4 British Muslim men, is a mess of contradictions, errors and fantasies. This unique investigation also explores the 'War on Terror' context in which the attacks took place and shows how an alternative look at the evidence suggests some very different culprits to those blamed by the official story.

Privacy Leslie P. Francis 2017-06-01 We live more and more of our lives online; we rely on the internet as we work, correspond with friends and loved ones, and go through a multitude of mundane activities like paying bills, streaming videos, reading the news, and listening to music. Without thinking twice, we operate with the understanding that the data that traces these activities will not be abused now or in the future. There is an abstract idea of privacy that we invoke, and, concrete rules about our privacy that we can point to if we are pressed. Nonetheless, too often we are uneasily reminded that our privacy is not invulnerable-the data tracks we leave through our health information, the internet and social media, financial

and credit information, personal relationships, and public lives make us continuously prey to identity theft, hacking, and even government surveillance. A great deal is at stake for individuals, groups, and societies if privacy is misunderstood, misdirected, or misused. Popular understanding of privacy doesn't match the heat the concept generates. With a host of cultural differences as to how privacy is understood globally and in different religions, and with ceaseless technological advancements, it is an increasingly complex topic. In this clear and accessible book, Leslie and John G. Francis guide us to an understanding of what privacy can mean and why it is so important. Drawing upon their extensive joint expertise in law, philosophy, political science, regulatory policy, and bioethics, they parse the consequences of the forfeiture, however great or small, of one's privacy.

Unsolved Murders in South Yorkshire Scott C. Lornax 2013-05-02 Whilst the passage of time can and has uncovered many secrets, killers could get away with their crimes in 1596 when Shakespeare penned these words and this is certainly the case in

more recent times as *Unsolved Murders in South Yorkshire* clearly demonstrate. The early chapters include cases of historic interest where killers certainly went to the grave in the knowledge they had got away with murder. Cases include suspicious deaths which left detectives in South Yorkshire baffled, but which were, it would seem, acts of callous murder which were not recognised as such due to dubious police opinions and practices. There are also cases of clear murder such as a man shot in the head during the Victorian period, whose killer was never identified. The later chapters, however, feature more recent cold cases where there is still the possibility that the wicked men or women who were responsible for such acts of inhumanity may remain within our society. Cases include a man murdered for less than 70 in a city centre multi storey car park, a teenage girl abducted, sexually assaulted and left dead on a dung hill, a young mother who entered prostitution and died at the hands of a man with more than sex on his mind, a pregnant woman who left home one day to go shopping but was found days later dead in a ditch with her throat cut and a disabled woman who was strangled in her home which was then set ablaze. For some of these cases there is the chance that someone has information which, despite the passage of decades, could lead to one or more individuals standing trial for murder. Justice can still prevail.
