Handbook of Early Childhood Intervention Jack P. Shonkoff 2000-05-22 Eighteen new chapters have been added to the 2000 edition of this valuable Handbook, which serves as a core text for students and experienced professionals who are interested in the health and well being of young children. It serves as a comprehensive reference for graduate students, advanced trainees, service providers, and policy makers in such diverse fields as child care, early childhood education, child health, and early intervention programs for children with developmental disabilities and children in high risk environments. This book will be of interest to a broad range of disciplines including psychology, child development, early childhood education, social work, pediatrics, nursing, child psychiatry, physical and occupational therapy, speech and language pathology, and social policy. A scholarly overview of the underlying knowledge base and practice of early childhood intervention, it is unique in its balance between breadth and depth and its integration of the multiple dimensions of the field.

The Origins and History of the All-American Girls Professional Baseball League Merrie A. Fidler 2015-05-07 This in-depth treatment of the organization and operation of the All-American Girls Professional Baseball League draws on primary documents from league owner Arthur Meyerhoff and others for a unique perspective inside the AAGPBL. The study begins with a brief history of women's softball, an important precursor to, and talent pool for, women's professional baseball. Next the book investigates league administration and organization as well as publicity and promotion. Later chapters cover team administrative structures, managers, chaperones, player backgrounds, and league policies. Finally, discussion focuses on the activities of the AAGPBL Players' Association from 1980 onward. Informed by many years of research and insights from former players, this exhaustive history contains 149 photographs.

The Woody Plant Seed Manual Part I Franklin T. Bonner 2017-07-08 The first comprehensive handbook on the seeds of trees and shrubs produced by the USDA

Forest Service was USDA Misc. Pub. 654, Woody-Plant Seed Manual. The manuscript was ready for publication in 1941, but World War II delayed publication until 1948. The boom in tree planting in the 1950s and 1960s created a large demand for seeds and exposed the gaps in our knowledge concerning production and quality of seeds of woody plants in general. The 1974 Handbook proved to be very popular both in this country and abroad, leading to five printings and translations in several other languages. More than a quarter-century after its publication, however, numerous advances in tree seed technology have dictated that a new revision is needed; the result is the current volume. Part I contains information on how to get seeds and raise seedlings. Get Your Copy Now.

The Hunt in Ancient Greece Judith M. Barringer 2001 Hunting and its imagery continued to play a significant role in archaic and classical Greece long after hunting had ceased being a necessity for survival in everyday life. Drawing on vase paintings, sculpture, inscriptions, and other literary evidence, Judith Barringer reexamines the theme of the hunt and shows how the tradition it depicts helped maintain the dominance of the ruling social groups. Along with athletics and battle, hunting was a defining activity of the masculine aristocracy and was crucial to the efforts of the Athenian elite to control the social agenda, even as their political power declined. The Hunt in Ancient Greece examines descriptions of hunting in initiation rituals as well as the ideals of masculinity and adulthood such rites of passage promoted. Barringer argues that depictions of the hunt in literature and art also served as striking metaphors for the intricacies of courtship, shedding light on sexuality and gender roles. Through an exploration of various representations of the hunt, Barringer provides extraordinary insight into Athenian society. -- Andrew Stewart, University of California, Berkeley **Journal** 1833

Physical Asset Management Nicholas Anthony John Hastings 2009-09-29 Physical asset management is the management of fixed or non-current assets such as equipment and plant. Physical Asset Management presents a systematic approach to the management of these assets from concept to disposal. The general principles of physical asset management are discussed in a manner which makes them accessible to a wide audience, and covers all stages of the asset management process, including: initial business appraisal; identification of fixed asset needs; financial evaluation; logistic support analysis; life cycle costing; maintenance strategy; outsourcing; cost-benefit analysis; disposal; and renewal. Physical Asset Management addresses the needs of existing and potential asset managers, and provides an introduction to asset management for professionals in related disciplines, such as finance. The book provides both an introduction and a convenient reference work, covering all the main areas of physical asset management.

Computers in Railways XV C.A. Brebbia 2016-09-15 This title incorporates the 15th proceedings of the very successful International Conference on Railway Engineering Design and Operation (COMPRAIL) series, which began in Frankfurt 1987 and continued in Rome (1990); Washington (1992); Madrid (1994); Berlin (1996); Lisbon (1998); Bologna (2000); Lemnos (2002); Dresden (2004); Prague (2006); Toledo (2008); Beijing (2010); the New Forest, home of the Wessex Institute (2012) and, again in Rome in 2014. The papers presented at this conference aim to update the use of advanced systems, promoting their general awareness throughout the management, design, manufacture and operation of railways and other emerging passenger, freight and transit systems. With the conference attracting a variety of specialists, including railway engineers, designers of advanced train control systems and computer specialists, the book particularly emphasises the use of computer systems in advanced railway engineering. Topics include but are not restricted to: Advanced train control Operations quality; Risk management; Planning and policy; Energy supply and consumption; Communications and signalling; Operational planning; Interface management; Systems integration; Maglev; High speed technology; Interoperability; Passenger flow management; Computer simulations and Driverless and automatic train operation.
