Synthetic Approaches to Nonaromatic Nitrogen Heterocycles Ana Maria Faisca Phillips 2020-11-17 A comprehensive overview of synthetic strategies for nonaromatic nitrogen heterocycles Nitrogen heterocycles are extremely widely distributed in nature, as well as in synthetic substances found in pharmaceuticals, agrochemicals, and materials chemistry. With new structures and medicines that include these structures emerging yearly, and a vast new journal literature to describe them, anyone who wants to be effective in R&D needs to easily access a synthesis of the latest research. This state-of-the-art survey explores recent developments in the most widely used reactions, as well as completely new ones. Highlights the major modern synthetic methods known to obtain nonaromatic nitrogen heterocycles, and their practical applications Topics include enantioselective synthesis and catalysis, photocatalysis, biocatalysis, microwave-assisted synthesis, reactions of oximes and nitrones, and ionic liquids Discusses how to synthesize rings of specific sizes Covers sustainable synthetic approaches for obtaining salts Whether you are using nonaromatic nitrogen compounds as an academic researcher, a synthetic chemist in industry, or an advanced student, this book is an essential, up-to-date resource to support your work.

Reflexology Inge Dougans 2005 This complete self-teaching guide is the perfect handbook for beginners and students alike. Fully updated, this bestselling title uniquely links Eastern and Western approaches to reflexology and health, making this a comprehensive guide to using the meridians and pressure points of the feet to treat a wide range of ailments. Reflexology, the gentle but highly effective form of therapeutic foot massage, has gained wide acceptance as a powerful, natural healing art. Remarkable results have been achieved with ailments such as back pain, chronic fatigue (ME), digestive problems, eczema, insomnia and migraine. Inge Dougans's new book includes her latest research into the benefits of her unique techniques and is a complete self-teaching guide suitable for beginners and students alike. Bringing together East and West by making clear the close connection between reflexology and Chinese meridian theory, internationally respected reflexologist Inge Dougans shows how the human body has its own internal energy lines -- or acupuncture meridians -- and reveals how to find and use the reflexology points and associated meridians on the foot to restore the body to its natural balance, prevent ill h

Die 5 Dysfunktionen eines Teams Patrick M. Lencioni 2014-10-16 Nach ihren ersten zwei Wochen als neuer CEO von DecisionTech fragte sich Kathryn Petersen angesichts der dortigen Probleme, ob es wirklich richtig gewesen war, den Job anzunehmen. Sie war eigentlich froh über die neue Aufgabe gewesen. Doch hatte sie nicht ahnen können, dass ihr Team so fürchterlich dysfunktional war und die Teammitglieder sie vor eine Herausforderung stellen würden, die sie niemals zuvor so erlebt hatte ... In "Die 5 Dyfunktionen eines Teams" begibt sich Patrick Lencioni in die faszinierende und komplexe Welt von Teams. In seiner Leadership-Fabel folgt der Leser der Geschichte von Kathryn Petersen, die sich mit der ultimativen Führungskrise konfrontiert sieht: die Einigung eines Teams, das sich in einer solchen Unordnung befindet, dass es den Erfolg und das Überleben des gesamten Unternehmens gefährdet. Im Verlauf der Geschichte enthüllt Lencioni die fünf entscheidenden Dysfunktionen, die oft dazu führen, dass Teams scheitern. Er stellt ein Modell und umsetzbare Schritte vor, die zu einem effektiven Team führen und die fünf Dysfunktionen beheben. Diese Dysfunktionen sind: - Fehlendes Vertrauen, - Scheu vor Konflikten, - Fehlendes Engagement, - Scheu vor Verantwortung, - Fehlende Ergebnis-Orientierung. Wie in seinen anderen Büchern hat Patrick Lencioni eine fesselnde Fabel geschrieben, die eine wichtige Botschaft für alle enthält, die danach streben, außergewöhnliche Teamleiter und Führungskräfte zu werden.

Corrosion Induced by Low-Energy Radionuclides Gilbert Bellanger 2004-12-18 Nuclear power plants emit radiation and particles across a range of energies. This radiation can cause corrosion to occur in critically important parts of the plant, which can lead to efficiency and safety problems. Gamma rays and neutrons have the highest energies and can break the metal bonds in interior metallic structures causing damage quickly and in easily monitored ways. Consequently these types of radiation and the best alloys to use to mitigate their effects have been extensively researched and their findings applied. However, the same is not true of low energy radiation which effects metal structures in a different way but can still cause appreciable and expensive corrosion. Low energy radiation degrades the passive oxide layers that protect metals. Without this protective layer the metals are easily corroded. This book uses tritium and tritiated water as models to describe the effects of low energy radiation on the corrosion of metals in these environments. Comprehensive coverage of the fields of liquid and gas flow, heat exchange, gas diffusion in materials, and of materials resistance to corrosion is ensures the reader has a full understanding of how these processes effect corrosion in nuclear installations. Such an understanding is essential for the efficient and safe running of all modern plant that uses radioactive material and this book is a critical reference tool for anyone involved in the nuclear power industry or metals research. * Unique coverage of low energy radiation and its corrosive effects in nuclear installations * Provides coverage of basic scientific principles contributing to corrosion * An essential reference for the safe and efficient construction and operation of nuclear installations * Applications in power generation, fuel reprocessing, military and civilian applications. * The first book to present detailed analysis of nuclear corrosion by low energy nuclides * The most complete book available for those serious about understanding corrosion in all its aspects * Keeping you at pace with the new methods that are changing the concept of corrosion in the nuclear industry

LEADING FROM THE HEART Alejandro Rodriguez 2020-08-16 Education is an art. Educational work, today, is considered a delicate task of accompaniment, a shared life project, intentionally proposed goals, and values assimilated by those who facilitate the educational experience itself: educators. Vitally linked to the educator is the student, the center of all educational action in his own social context, in his personal dynamism, in his generational sensitivity, in his dreams, and in his aspirations. The educator and the student are key factors in the learning experience. Both are an essential element in the educational universe. Both are, metaphorically speaking, a binary star: two bodies with similar mass orbiting around a center of mass in elliptical orbits. In the absence, or loss of one of them, in the relationship or in their own individuality, the educational experience itself is destroyed. Both must fluctuate in the role of each other, linked, but not assimilated. In this book, education is an art that touches the most sensitive fibers of the whole student: the heart. The heart is understood as the center of decision-making, as the place where affections are clearly present, as the meeting point where will and reason converge, like the horizon in which educational love meets and intertwines with reason and openness to transcendence.

Enigma - Ignorance Liquidation - part №1 Oleg Viktorovich Maltsev Recently I have encountered a certain state of affairs, quite an idiosyncratic one... try to imagine this, there is a social networks page of an Italian master, who lives somewhere in a Puria or Calabria, not very intelligent person ... So, he has been making a “summon” in Facebook for masters to unite against me. Well, I did not quite get for what reason ones would unite against me, anyways, there is such a happening. Probably, this is due to the fact that I am researching culture of Italy, the true history of Italy. So here is a person who pretends to be an owner of the Italy through his social networks account. He is quite a strange person, he has got on his avatar a picture of a strange guy with a helmet and a spear. This very individual, demonstrated outmost regret to the fact, that foreign people, as me, would teach someone of Italian culture. I was sincerely surprised as I had no intention of teaching someone the Italian culture. As first of all, I wanted to teach myself. However, this individual in his certain comments on Facebook was demonstrating real regret as in his opinion I was posing a real threat, somehow, to Italian history. Moreover, having some sort of idea that he is an owner of Italy – he was showing regret of Sicilian master that have same intention as I do, that is restoring and revealing genuine Italian culture and history of martial arts. Besides, he used to claim that my school appeared just in one day, which was a great surprise for me, as I believed that this school appeared thousands and thousands years ago. Certainly, it flatters me, him regarding me to be a founder of Venetian school ... I have always considered myself to be a follower of this school and not a founder, and definitely, not an owner of it. Well, since certain Calibrian – Purian masters awarded me with a title of the founder of the Venetian school, let’s pretend me being an immortal one, aged 3000 years, and that I am great enough to teach all the rest of Italian martial arts culture. However, it should be pointed out that indeed, there are a lot of things to be taught. Even though I feel proud that it is claimed that I am a founder of Venetian school by representatives of Purian - Calabrian martial arts school, I have a lot of things to get presented and explained ... but on a different topic. Having read up to the end this wonderful post in internet, I came to a conclusion that it is the right time to start a journey. When you see my students, when you watch them training, some tend to think that they have been doing martial arts like for half a year. Obviously it is not the case.

Flying High in a Competitive Industry Loizos Th Heracleous 2006 Singapore Airlines (SIA) is widely acknowledged as one of the leading airlines, if not the best airline, globally. This book provides insights into a simple but intriguing question: How has SIA managed to outperform other

flag-carriers for decades, in an industry where it is notoriously difficult to succeed consistently? Flying High in a Competitive Industry begins with an analysis of the airline industry and its key trends, moving on to a broad outline of SIA's strategic drivers of success. Empirical research was conducted at SIA to gain a deeper understanding of its strategy, core competencies and internal organization, innovation processes, and human resource practices, in order to distill strategy lessons that can inform the strategies of any organization competing in intensely competitive industries. The book ends with some strategic lessons that we believe apply to any organization that aims to achieve sustainable success in hyper-competitive markets.

The 5 Elements of the Highly Effective Debt Collector Timothy J. Daye 2011-07-13 The 5 Elements of the Highly Effective Debt Collector is the first “How to collect a debt” book of its kind, in that it breaks the debt collecting process down into five core fundamental areas. After years of training in the collection industry, I have found that these five fundamental areas are at the center of revealing the mystery behind why only a small percentage of debt collectors produce at a high level and more importantly explains why the larger percentage of low to mediocre performers never reach a top producing level. Not only does this book establish fundamental concepts every debt collector must understand to maximize personal or agency’s earning potential, it also teaches: sound principles of engagement, valuable communication concepts, effective sales rebuttal techniques, as well as a system of file management that if followed and executed properly will more than double a collector’s efficiency and effectiveness in less than 30 days... The 5 Elements’ principles and concepts were designs to ensure that no matter an individual’s talent level, years in the industry, or position held within an agency, the end user will understand clearly and be enriched by the experience.
